

# ESET ENDPOINT SECURITY

FOR ANDROID

[www.eset.com](http://www.eset.com)

**Operating Systems:**  
Android 2.0 and higher

**Touch Screen Resolution:**  
Minimal 240 x 320px  
Recommended 320 x 480px or higher  
5MB of Free RAM

	WHAT IT DOES	WHAT'S THE BENEFIT
<b>Remote Lock</b>	Locks lost or stolen devices by a remote SMS command.	After locking, no unauthorized person can access data stored on the device.
<b>Remote Wipe</b>	Safely deletes all contacts, messages and data on removable memory cards.	Keeps company data away from prying eyes. Advanced cleaning procedures ensure that it is not possible to restore wiped data (Android 2.2 and higher).
<b>GPS Localization</b>	Remotely locates the phone using a remote SMS command and tracks the phone's GPS coordinates.	Increases the chances of the devices retrieval in case it gets lost or stolen.
<b>SIM Matching</b>	The Admin Contacts phone number will receive a wealth of information about the inserted SIM, including the phone number, IMSI and IMEI codes.	Stay in control of your company smartphones remotely, even when an unauthorized SIM card is inserted.
<b>Admin Contacts</b>	Set up one or more Admin Contacts for your company mobile fleet. Receive all the important information in the event of a device loss or theft.	Stay in control of your company smartphones remotely. Protect phone-stored data.
<b>Call Blocking</b>	Blocks calls from unknown or hidden numbers and also calls to unwanted numbers.	Keep your company's phone bills under control.
<b>Uninstall Protection</b>	Prevents unauthorized persons uninstalling the solution (Android 2.2 and higher).	Keep company mobile fleet protected 24/7.
<b>SMS/MMS Antispam</b>	Filters out unwanted SMS/MMS messages through custom blacklists/whitelists.	Control what you receive or simply block all unknown numbers.
<b>Real-time Protection</b>	Protects all applications, files and memory cards with the ESET NOD32 proactive technology optimized for mobile platforms.	Protection of valuable company communication and data on mobile devices.
<b>Security Audit</b>	Checks the status of all vital phone functions, including battery level, Bluetooth status, home network, disk space and running processes.	Give your mobile workforce perfect oversight of their mobiles' performance.
<b>On-demand Scanning</b>	Provides reliable scanning and cleaning of integrated memory and exchangeable media. Supports scanning of specific folders.	In-depth protection of company mobile fleet.
<b>On-access Scanning</b>	Advanced scanning protects company smartphones and tablets from threats attempting to access the system via Bluetooth or Wi-Fi.	Protection on the go across a range of potential attack vectors.
<b>Administrator Message</b>	Allows administrator to push a message to the device with custom text via ESET Remote Administrator.	Address potential security issues on the fly.
